Cleaning

During the inspection and when you leave your home, it must be thoroughly cleaned and in a well-kept condition. All storerooms and other spaces that you dispose of must be cleaned and emptied of personal belongings. If you don't clean yourself, you have to make sure it is done in another way. If we do not approve the cleaning upon inspection, we will have to charge you the full cost of the cleaning that we have to do, starting fee SEK 1,500.

The checklist on the right will help you meet the requirements we have for the move-out cleaning. If you clean and restore according to the checklist, you can be pretty sure we approve of your work.

Synonyms for the word clean are "wash, scrub, scrub, polish, brush, rinse, wipe, polish, rub, sweep, dust, vacuum". You can decide for yourself which method is most suitable for the various situations.

Vinegar or citric acid is good against limescale and soap works great as an all-purpose cleaner.

Coarse garbage

Coarse rubbish such as small furniture must be broken up and thrown away in our waste containers, they must not be left next to the container or in the waste room. Take sofas and beds to the nearest recycling centre. Any nail holes and drill holes in the wall must be puttied and painted! You order paint, putty and other standard materials at the expedition, at no extra cost, two weeks in advance. We do not have everything in stock.

Remember!

To remove stickers and the like.

That all equipment that was in the home when you moved in must be left behind, e.g. curtain fittings, blinds and the like.

Empty the mailbox.

There are many cleaning tips on the internet.
